KING

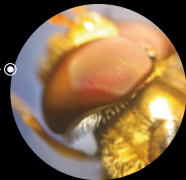

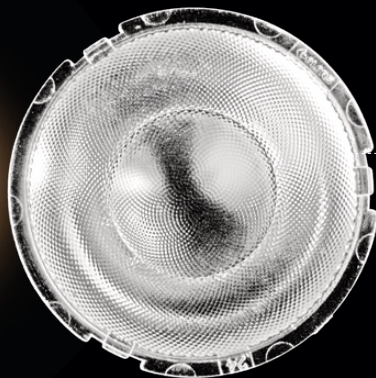

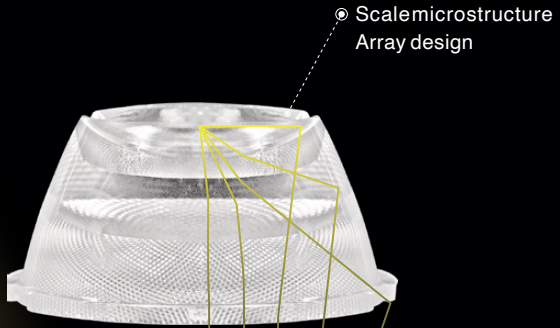

KING series has a deep anti-glare design, shade angle of 35°, narrow edge design 5mm, with excellent optical design, patented lens design, multiple optical options, the highest light effect of 100LM/W, luxury villas and star hotels, light spot uniformity and soft. The product's full metal design and anti-light leakage design meets the designer's ultimate pursuit of product application.

Patented lens design

Bessel's internal hole mixing design provides a delicate and smooth transition of the wallwashing spot with precise control of each beam of light.

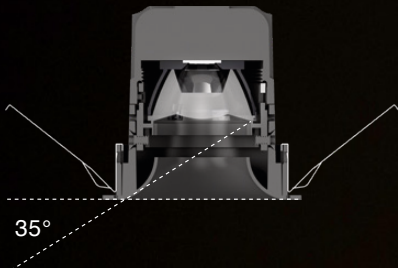

Fermat Curve

Black light tech
design

Deep anti-glare High efficiency

100LM/W

UGR < 1

(The picture is the actual effect of 15W, King series)

slightly different

Superior industrial design

Technological and natural aesthetics combined

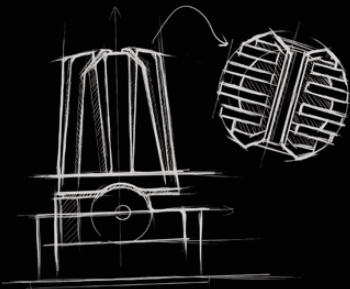

Sports Cars

Taking a cue from BMW's concept sports car, it inherits its futuristic and technological feel.

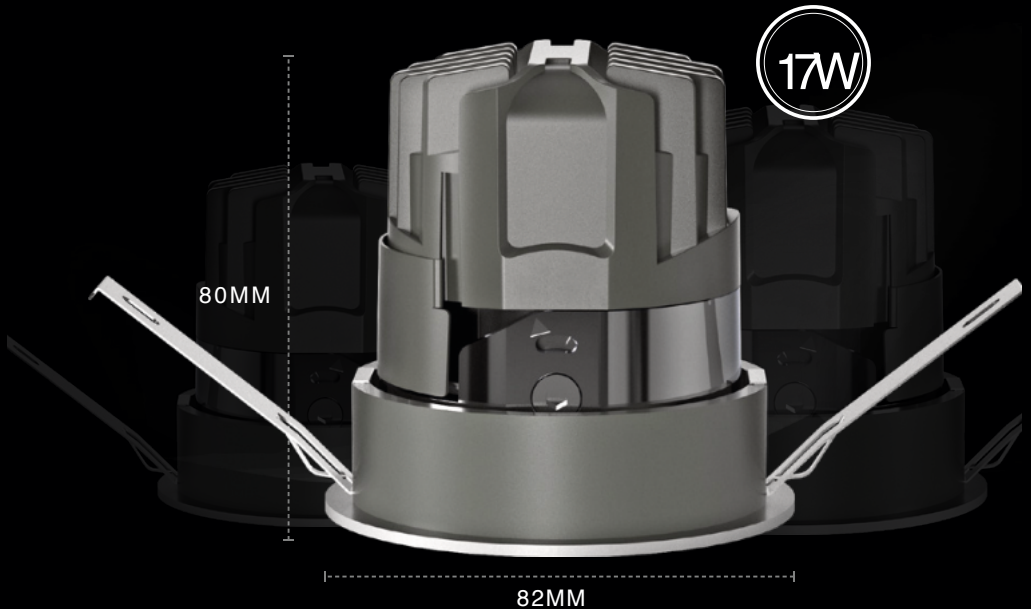

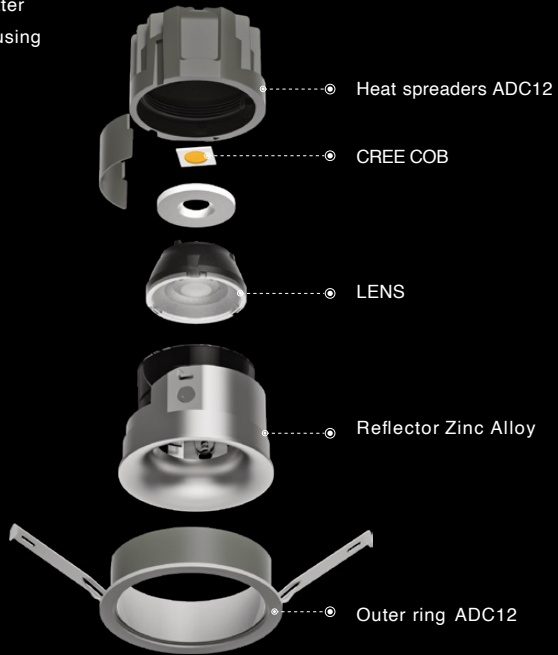

Rock

The product has the layers and hard appearance of mountain rock, and the coldness highlights the product's focus on function.

Full metal body design. Small size, high power

More exquisite appearance, better
heat dissipation performance using
new zinc alloy material
Max. power 17W

Rigorous thermal design management

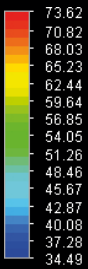

Longer luminaire life, reliable and stable quality

COB

TCPoint

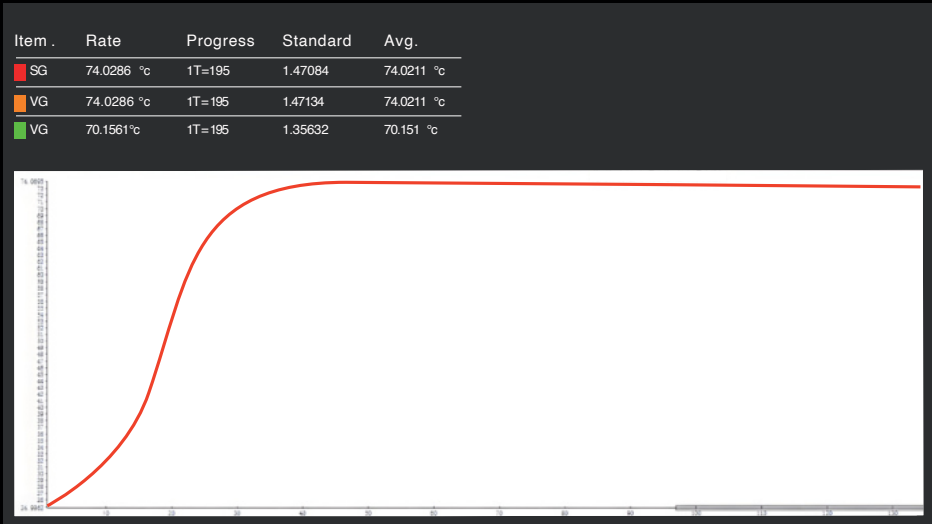

LEDDownlight Heat Dissipation Simulation

Temperature °C

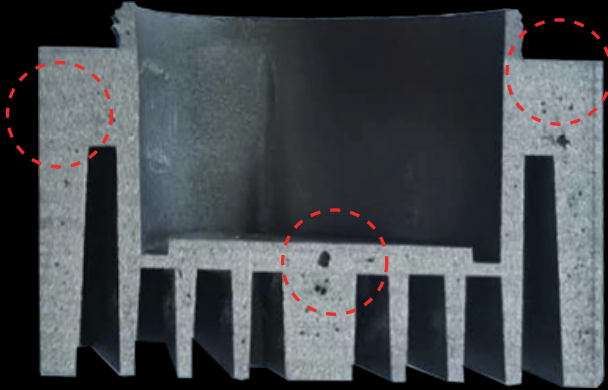

Curve of TCpoint temperature after lighting

Strict manufacturing process

Stronger heat dissipation ability

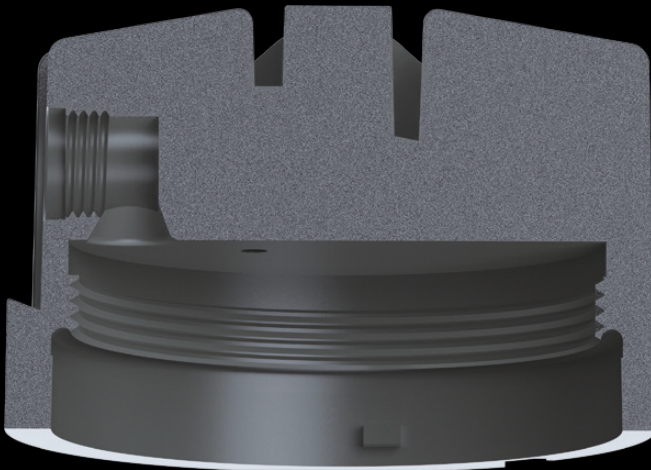

Downlight radiator section

Champagne Gold

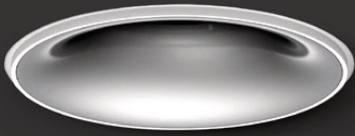

Black Border

White Border

Split design

Split design, easy to replace the reflector and radiator modules, easy maintenance, without damaging the ceiling.

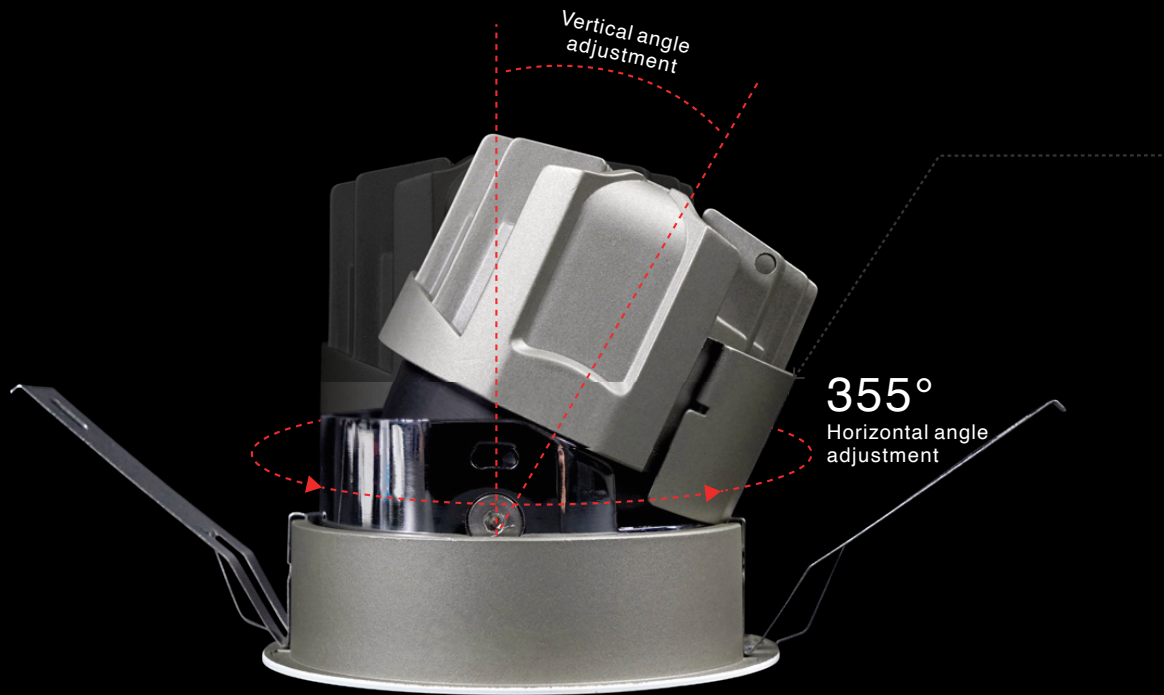

Mechanical angle adjustment

Anti-light leakage structure design

Mechanical adjustable angle, with a good degree of tension.

Anti-light leakage structure design, so that the light out of a more efficient design

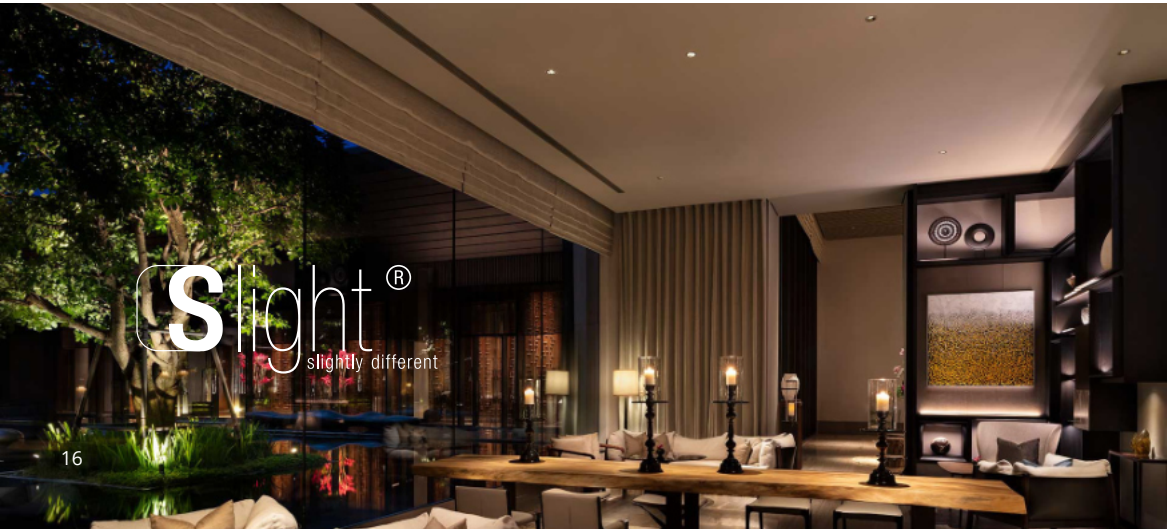

Light barrier design
